### Other Requirements

The Burnet Institute is a child safe organisation. The incumbent of this position may be required to undergo a Police Check or Working with Children Check as a condition of their employment.

### SECTION D: Burnet Overview

Burnet Institute is a leading Australian, unaligned, not-for-profit organisation focused on achieving better health for vulnerable communities in Australia and internationally by accelerating the translation of research, discovery and evidence into sustainable health solutions.

Since 1986, Burnet has linked discovery-oriented, medical research with practical action to help solve devastating global health problems that affect the most vulnerable. This sets us apart from other organisations. Institute-wide interdisciplinary health programs - Maternal, Child and Adolescent Health; Disease Elimination; Behaviours and Health Risks, and Health Security - are at the heart of our daily decision-making. The Institute's highly diverse skill base of laboratory and field research, and technical expertise, is fostered across cross cutting disciplines of Life Sciences, Public Health and International Development.

Whilst our headquarters is in Melbourne, Australia, we also have offices in Papua New Guinea and Myanmar, and are actively involved in research and public health programs throughout Australia, the Asia-Pacific region, and Africa. Burnet is the only unaligned organisation in Australia that has dual accreditation with both the Australian National Health and Medical Research Council (NHMRC) and the Department of Foreign Affairs and Trade (DFAT).

## **Reducing the Impact of Drug-resistant Tuberculosis in PNG (RID-TB) Project Overview**

Burnet has a long history of collaborating with donors, Government and other partners in particular areas of need in Papua New Guinea. Since August 2014, Burnet has been a partner in the multi-stakeholder response to the major TB epidemic in Western Province. This epidemic is characterised by the emergence and spread of drug-resistant TB (DR-TB) with Daru as the known hotspot of intense transmission of DR-TB. This is a public health emergency with rates of DR-TB that are arguably the highest documented globally at the district level.

Burnet is contributing to the response as the technical lead in the design of an effective response and in monitoring its implementation. Burnet is utilising a partnership approach with Western Provincial Health Authority and other implementing partners such as World Vision International.

Burnet implemented Phase I of RID-TB from August 2014 to November 2015, Phase IIA from December 2015 – March 2018 and is currently implementing Phase IIB. The project is funded via the Australian Department of Foreign Affairs and Trade and Burnet's activities align with the goal and objectives of the Western Province Annual Implementation Plan (for TB). The successful achievement of the goal and objectives will require adequately resourced contributions from a range of partners. Phase IIB has 5 strategic interventions aligned to the Western Province Annual Implementation Plan.

- 1) Design and support the implementation of a TB elimination model in Daru
- 2) Identify health systems bottlenecks for TB and design and support the implementation of systems solutions
- 3) Identify needs, strategies and modalities for community engagement to strengthen the delivery of effective TB care
- 4) Support utilisation of program data and operational research for effective action within the TB program response
- 5) Support the decentralisation of care in South Fly District

Across each of these areas, Burnet is responsible for building capacity of health workers, TB program staff, community members, volunteers and other stakeholders in the skills and knowledge they need to deliver the response. Strong collaborative relationships with provincial and national stakeholders from the community to policy maker levels will remain fundamental to the delivery of technical assistance within the response.
